White will lose the Na8 but can make a desperado move : Nxb6!

This way White will get a pawn before losing the kNight ..

(White can also play Rd1, attacking the Bd6, and then capture the Na8)

Black just did g5-g4, attacking 2 White pieces by a 'fork'.

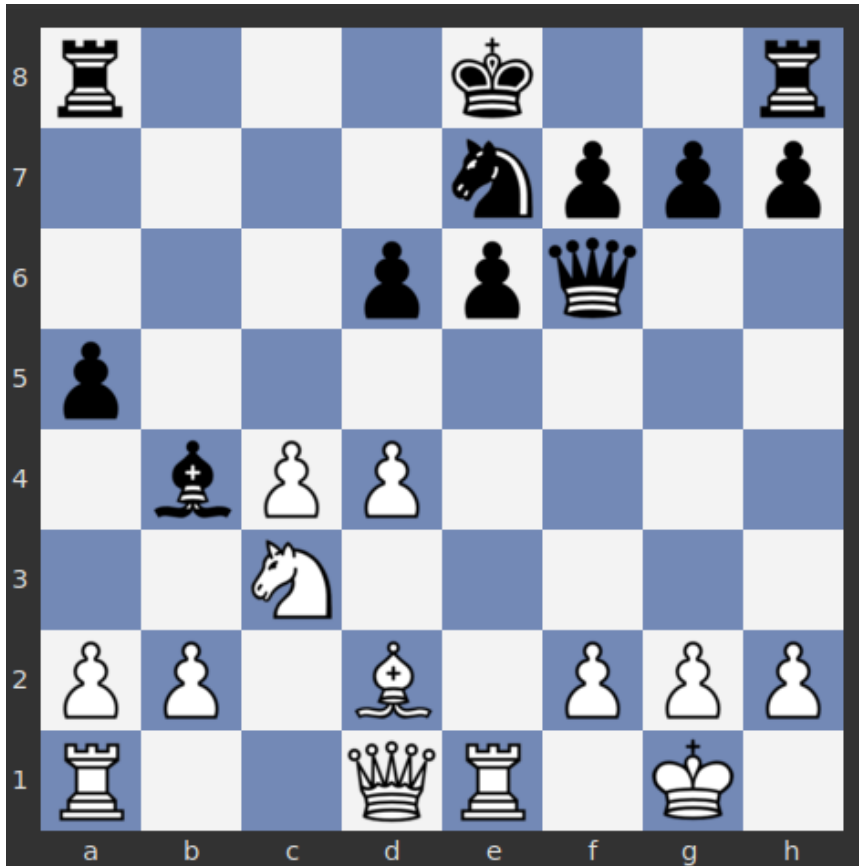

White will lose one of those 2 pieces but has a desperado move : Rxh7+

This is check, so Black can not capture the Queen.

After Kxh7 White will save the Queen.

Here White played a2-a3, forcing Bb4xNc3.
Now White has the in-between move : Qa4+
This forces the Black King to move and he can no longer castle,
which gives White an advantage.
After the Black King moves, White will capture the Bc3.

Black captured the knight : Rb8xa8
Black expected White to recapture by Ra1xa8
but White made the in-between move : Rf1-b1+ !
Now the Black King must move and no longer cover Ra8,
which will be captured next turn.

Black just captured on c1 with the Rook and he expects White to recapture.
But here White has the in-between move : Rxc6+
In fact this move is a desperado : after hxc6 White will capture the Rc1.
By this tactic White is a pawn up and thus won this game.

Qf3!

This a double attack on Qc6 (which is undefended!) and f7 (Qxf7 will be mate!)
The best Black can do is Qxf3 but then White does the in-between move : Bxc5+
This way White won a piece.

White is a pawn down but the Black King is under attack, and White is much better : he could exchange Queens by Qc4xd4, which opens the c-file, and win the game, but he spotted the in-between move : Nb5!

Now Black can not capture Qc4 because of Nxa7#

So Black tried Bxb5, but before recapturing Qxb5 White spotted the in-between move : Bxb7+! This way Black was mated soon.

White played Qxf6!
 Black can't play gxf6 because of Rg4+ and then Bg2xc6 : White won a piece.
 After Qxf6 Black makes the in-between move Qc6xRe4 !
 But then White has the forcing in-between moves Qxf7+! Rxf7 exf7+
 Finally White recaptures Qe4.
